Benchmark Insights - Enhanced Auto Job Matching

For those who have Benchmark Insights in Predictive People Analytics (PPA), phase 2 of auto job matching will be released this Friday on v10.0! This functionality aims to streamline the process of matching jobs against those in the benchmark library using AI technology. The system will be able to run a benchmark job import in the background and match your job titles to an exact title and/or any title closest to it.

Phase 1 of this rollout, released on 12/01/23 for v9.23, automated the matching process of all client positions to top level job titles with a single click.
Phase 2 now includes the ability to match the titles by state and by industry, while also allowing users to edit each matched entry.
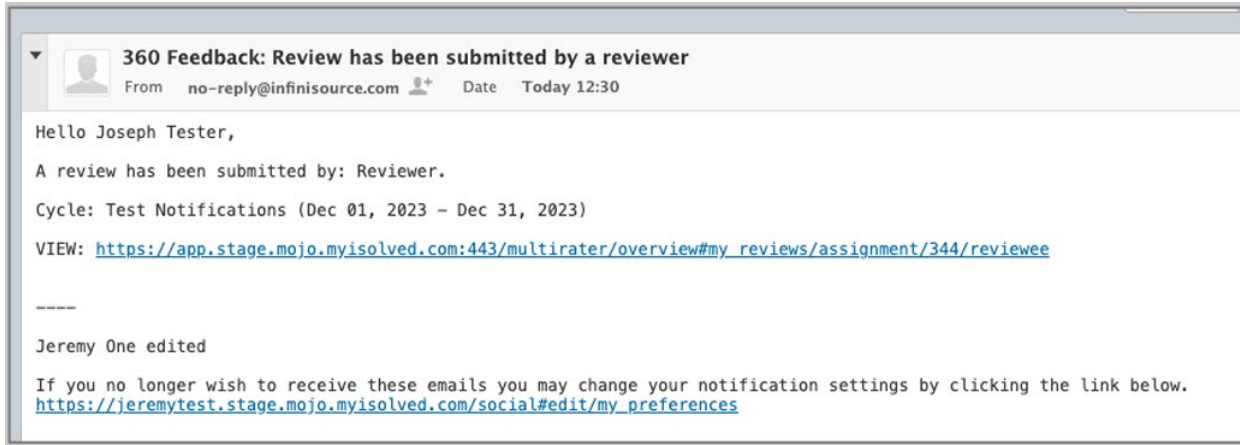

Share & Perform

Notifications Update

In the Share & Perform release v10.1 on 01/04/2024, notifications have been updated to utilize the same applications as the Core product. The verbiage of the notifications has not changed, but the email and formatting has been updated to reflect the capability of the new application. The return email address now is going to be the same as the environment it is coming from rather than the 'no-reply@isolvedhcm.com'.

Human Resources

2024 Release Schedule

New year, new schedule! We are approaching the release schedule this year a little differently to ensure the quality of releases goes out. What will be different this year will be the timing of Feature and Maintenance releases:

- Feature items: Go out the first release of the month.
- Maintenance items: All other releases in the month

Please note: We are not going to have a release on May 31, 2024. This means there will be a three-week gap period between the v10.9 release on May 17 and v10.10 release on June 7, after which the schedule will resume to the 2-week cadence.

Screen Updates

Over the next few months, you will see that we are refreshing several screens, moving them to a more modern look using the new grid style that you have already seen on other newer screens. The overall functionality stays the same with some differences noted below.

This is an example of the new screen, where you can sort, filter, group, and view all pieces of information:

Employer	Job Title	Job Description	Start Date ↓	End Date	Ending Salary	Change Reason	Manager/Reference	Location
ABC Finance Company	Project Manager		1/16/2012	6/25/2020		Reduction in staff		
Big Box Retailer	Stockperson		12/5/2010	1/15/2012	$10.00 per hour	Finished school
