Please refer to the full [Symmetry Release](#) document for more details.

isolved™

Learn & Grow Content Library

isolved is partnering with Go1 to offer their full library of courses to isolved customers. The full library includes approximately 89,000 courses that are aggregated from the best course providers. With that many courses, there are multiple versions of just about every topic out there, presented in different styles from different providers. Billing will also now be done exclusively through isolved.

Employees will be able to access the Content Library on their own and will be able to sign in using their isolved username and password. Administrators have the option to block employee use and assign courses directly.

To help customers wrangle the course library, a conversational AI tool has been introduced. The tool allows users to ask for recommended courses using plain language, and then view links to the courses right in the chat tool.

Got any Excel?

Sure! Excel is a great skill to have for data analysis, financial modeling, and project management. Here are some Excel skills that you can learn:

1   **Data analysis in Excel:** Learn how to use Excel's powerful data analysis tools to analyze and visualize data.

2   **Financial modeling in Excel:** Master the art of building financial models and performing financial analysis using Excel.

3   **Excel formulas and functions:** Explore the various formulas and functions in Excel to perform calculations and automate tasks.

4   **Pivot tables in Excel:** Discover how to create and manipulate pivot tables to summarize and analyze large data sets.

5   **Excel charts and graphs:** Learn how to create visually appealing charts and graphs in Excel to present data effectively.

Screen Updates

Over the next few months, you will see that we are refreshing several screens, moving them to a more modern look using the new grid style that you have already seen on other newer screens. The overall functionality stays the same with some differences noted below.

This is an example of the new screen, where you can sort, filter, group, and view all pieces of information:

The following Screens have been updated in this release.

Client Management > Labor & GL > Labor Table:

- Updated grid layout.
- Added filtering to all columns.
- Added edit button.
- Added field to show when a labor value is attached to an organization or date.

Employee Management > Employee Pay > Garnishments:

- Updated grid layout.
- Added export to Excel.
- Added filtering to all columns.
- Added edit button.
